Hindle Muffler Break-In Procedure Instructions

Enclosed is your NEW Hindle Muffler. A break-in procedure must be performed for new Hindle mufflers. Install Hindle muffler, as per instructions included with Slip-on adapter or Front Section. Once installed, Hindle muffler must be warmed up by running the engine at idle for 15 minutes. Hindle muffler should then be left to cool down for 15 minutes. This process will help prolong the life of your Hindle muffler by helping set the internal muffler packing before first use.

Please note: Hindle mufflers require general maintenance: repacking of the muffler should be done, when required. Repacking will help protect the muffler's outer shell, as well as noise and exhaust emissions.

Enjoy the quality and performance of your new Hindle Exhaust System!
